

Problem Set 10
COMP301 Fall 2019
19.12.2019 17:30 - 18:45

Problem 1: You are given the `Letrec` with continuations implemented using **data-structural representation**. Take your time to understand and digest how it works. Your task is to convert this to `Letrec` with continuations implemented using **procedural representation**. You can refer to the lecture slide for help too.

Problem 2: Implement factorial function with continuation passing. You can use the boilerplate given in the codes file.

This is the last PS! Thank you for coming all this way...
